April Ground School

## Light-weight Construction for Electrics

Date: **April 22<sup>nd</sup>, 2010**  
Times: Presentation starts at 7:30  
Arrive early for hangar talk  
Location: EAA Chapter 13 Hangar at Ray Airport (hangar 304)  
Format: Presentation & discussion  
Speaker: Keith Shaw

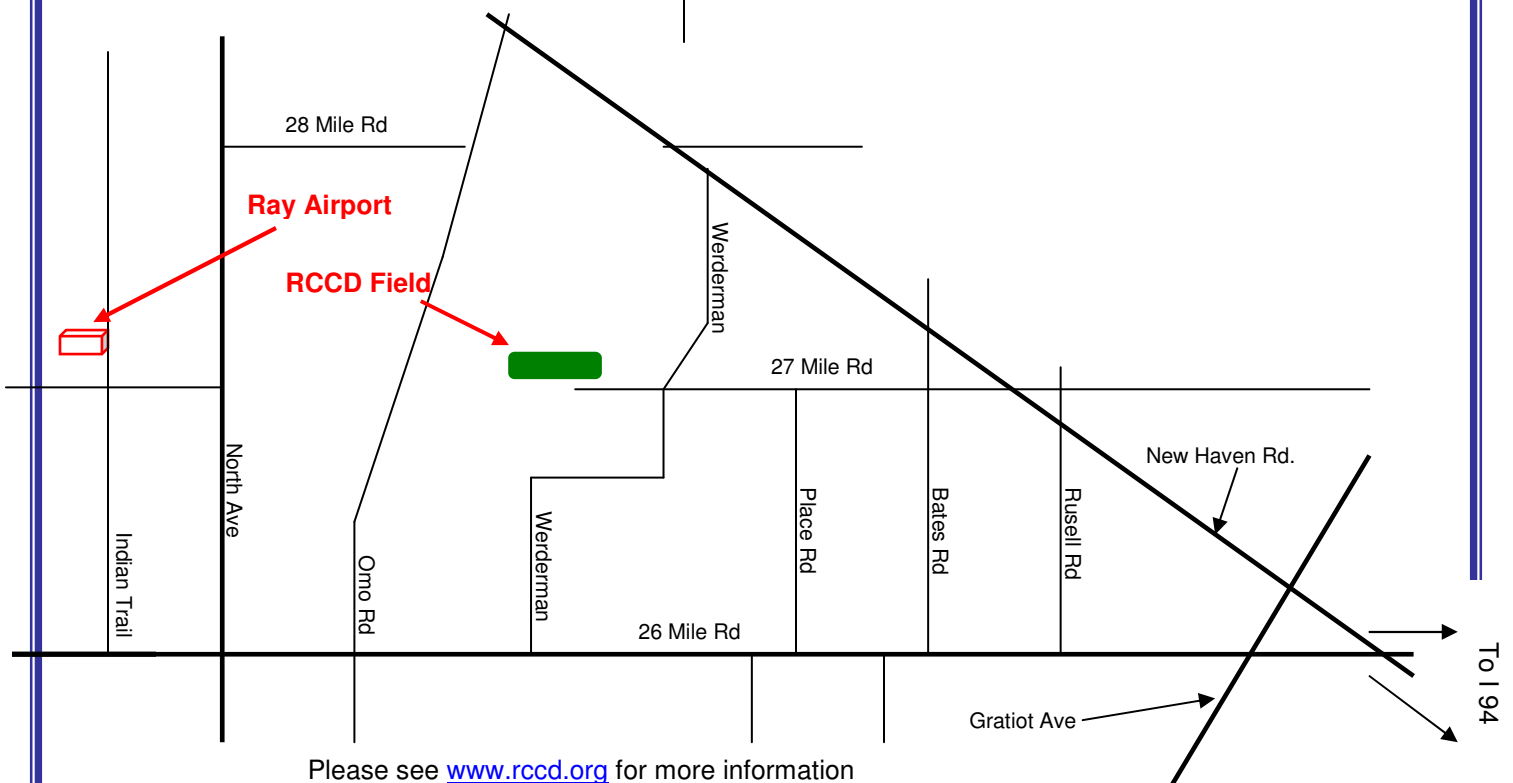

KEITH SHAW

Keith Shaw is well known in the model aviation world for his pioneering work in electric propulsion and generously shares his experience with his fellow modelers, through his articles and presentations.

He is also an accomplished builder and pilot. At RCCD's April Ground School, Keith will discuss construction of light-weight airframes aimed at electric propulsion. The *Moeller Stomo* that he flew at the 2009 RCCD Electric event is a great example.

In addition, he will address some of the benefits and considerations of scratch-building model aircraft.

Mark your calendars and join us. Visitors are welcome at RCCD Ground Schools.
